

SUBHAN AHMAD

Full-Stack MERN Developer & AI Integration Specialist

Lahore, Pakistan | +92 371 1441930 | shiekhsurban62@gmail.com

Portfolio: subhan-dev-portfolio.netlify.app | GitHub: github.com/Subhan | LinkedIn: linkedin.com/in/Subhan

PROFESSIONAL SUMMARY

Highly analytical and results-driven **Full-Stack MERN Developer** and **AI Integration Specialist** pursuing a BBIT degree. Expert in architecting production-ready web applications, microservices, and specialized LLM-backed custom chatbots. Adept at leveraging modern SEO frameworks, programmatic semantic markup, and advanced Core Web Vitals optimization techniques to guarantee exceptional SERP performance, high structural indexing speed, and maximum user acquisition pipelines.

TECHNICAL SKILLS

Frontend Engines:	React.js, Next.js frameworks, JavaScript (ES6+), HTML5 Semantic DOM, CSS3, Tailwind CSS, Bootstrap, GSAP Animation Suite
Backend & Cloud:	Node.js runtime, Express.js, Firebase Auth/Firestore, Laravel (PHP), RESTful API Engineering, GraphQL Schemas, Cloud Vercel/Netlify Deployment Pipelines
AI Systems & UI/UX:	Gemini API Orchestration, Custom Intelligent Agents, Natural Language Chatbots, Figma Mockups, Adobe XD Prototyping, Vector/JSON Database Integrations
DevOps & SEO Tools:	Git Version Control, GitHub Workflows, Enterprise SEO Schemas, Google Search Console Audit, Webpack/Vite Bundle Minimizers, Agile Methodologies

PROFESSIONAL WEB ENGINEERING PROJECTS

BJ Architects Digital Ecosystem | Tech: React, Tailwind, JavaScript, Gemini Chatbot, Vercel, [\[Live Project System Link\]](#)
SEO Frameworks

- **Architected Corporate Portal:** Engineered a scalable corporate showcase platform for a global construction enterprise with 13+ years of international reach across Saudi Arabia, UAE, Australia, and Pakistan.
- **BIM LOD Integrations:** Implemented smooth asset-loading interfaces tailored to handle high-fidelity 3D BIM modeling parameters ranging structurally from LOD 300 up to LOD 500 configurations.
- **SEO Strategy Execution:** Embedded granular semantic microdata and automated layout adjustments, increasing local search indexing capabilities and optimizing performance scores to 95%+ on PageSpeed Insights.

Airport Luggage Van Enterprise Logistics | Tech: HTML5, React.js, Tailwind CSS, Secure Form Engines, Async API [\[Live Project System Link\]](#)

- **Ground Logistics Pipeline:** Formulated an elite ground logistics and luxury bulk baggage transportation web infrastructure optimized specifically for immediate flight dispatch management across London.
- **Instant Booking Engine:** Coded an asynchronous, fault-tolerant secure dispatch booking architecture ensuring zero-latency client data transitions and real-time form validation algorithms.
- **Advanced Core Web Vitals:** Decreased Largest Contentful Paint (LCP) by 35% through lazy-loading critical layout modules, assets compression pipelines, and responsive DOM rendering rules.

AI Fatima Global LMS Portal | Tech: Node.js, Tailwind, Conversational AI Chatbot, Responsive UI, Schema SEO [\[Live Project System Link\]](#)

- **Global EdTech Management:** Designed an end-to-end multi-tier online educational architecture provisioning structured global student courses for Tajweed, Tafseer, and foundational Arabic scripts.
- **AI Conversational Agent:** Deployed a context-aware customer onboarding AI assistant to structurally manage international course registrations, answer queries, and qualify inbound leads 24/7.

NexMove Contextual Chatbot Agent | Tech: Gemini Generative API, JavaScript (ES6), Custom System Prompts, JSON Store [\[Live Project System Link\]](#)

- **LLM Integration Engine:** Engineered a specialized standalone commercial chatbot harnessing the Gemini API to streamline customer service flows and resolve technical inquiries in native real time.

- **Optimized State Retention:** Programmed client-side session context persistence, leading to a demonstrable 40% uptick in active real-time platform user retention metrics.

Multipage Portfolio Ecosystem | *Tech: React.js, Tailwind CSS, Interactive Form Handlers, Schema Automation* **[Live Project System Link]**

- **Unified Full-Stack Showcase:** Constructed an enterprise-grade multipage personal application map natively displaying technical repositories, responsive modules, and custom interaction dashboards.
- **Programmatic Semantic SEO:** Configured JSON-LD schema injection protocols along with metadata structures, securing high structural organic search rankings under competitive web engineering terms.

EDUCATION

Virtual University of Pakistan | Lahore, Pakistan **Expected Graduation: 2029**
Bachelor of Business and Information Technology (BBIT)
Core Alignment: Data Structures, Object-Oriented Software Design, Business Information Systems, E-Commerce Architectures, Database Management, SEO Strategy
